Person.

She is most strangely called the mother of the owner of the family ~~of~~ statuette group, although another name stands after his as his mother's name. Engelbach envisages two possibilities:

1) The name after the owner's name, although clearly belonging to a woman, must be that of his father.

2) His mother had two names

He is wrong. Reality: she is (snt) mwt=f, that is, his aunt

Тут всё не ясно. Почему z^{3}?
„Живой, когда он бодр" (?)
Плагиа ли $\overset{\frown}{\text{}}$ вместо $\overset{\frown}{\text{}}$ - это имя?
Если да, то можно читать $z^{3}\sim$
$nbw-njwt$. Но не думаю.
