Мумия Нефера

Недалеко от Каира, в районе Саккара, археологи сделали открытие, которое, как полагают, по его научной значимости, возможно, даже превышает значение открытия в 1922 году гробницы Тутанхамона, фараона, правившего в Египте в первой половине четырнадцатого века до нашей эры.

Как сообщает газета «Аль-Ахрам», найдена мумия музыканта по имени Нефер, умершего около четырех с половиной тысяч лет назад. Таким образом, это самая древняя мумия из всех, найденных на сегодняшний день археологами.

Газета «Аль-Ахрам» особо отмечает, что мумия и саркофаг находятся в прекрасном состоянии.

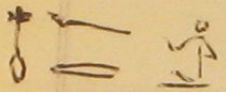

В. ФЕДОСЕЕВ.
