## ACKNOWLEDGEMENTS

I am deeply indebted to my scientific supervisor Igor M. Diakonoff who encouraged me in this work and even started improving its English style.

My special thanks go to Dr. Leonid E. Kogan (the Oriental Institute of Moscow State University for the Humanities) and Loretta M. Golovleva (the Institute of Oriental Studies, St.-Petersburg branch) who read the Russian version through and made a series of useful remarks.

I'd like to express my gratitude to Profs. Nelly V. Kozyreva of the Faculty of Oriental Studies, St.-Petersburg State University, and Vladimir A. Jacobson of the Institute of Oriental Studies, St.-Petersburg branch, for their helpful remarks on historical context and the meaning of some terms in the texts treated.

The author has benefited from the help of Adel V. Nemirovskaya of the Faculty of Oriental Studies, St.-Petersburg State University, during all stages of preparing the manuscript for publication.

I owe a great debt to Prof. Shlomo Izre'el of Tel Aviv University and Dr. Eran Cohen of the Hebrew University of Jerusalem for their important comments on both the form and contents of the manuscript. I'm extremely grateful to Prof. Shlomo Izre'el for his recommendation of the work to be published, as well as for his kind support, good will and efficiency.

Last but not least, I wish to express my heartfelt thanks to Dr. Ulrich Lüders of LINCOM EUROPA for accepting this manuscript for publication.

## PREFACE

The conjugated forms traditionally named as the Present, Preterite and Perfect are the main components of the Akkadian aspect-tense verbal system. The existence of the Akkadian Perfect and the peculiarities of its usage had been the subject of lengthy discussion resulting in the section “Das Perfekt” in GAG 1952, § 80. The section was included into GAG 1995 without any serious changes.

When studying the Perfect in MA we came to the conclusion that the use of the Perfect in that dialect should have been explained a way different from that suggested by von Soden. Thus, the necessity arose to check anew the use of the Perfect at the earlier stages of the development of Akkadian. Typically, the frequency of the Perfect is different for texts of various genres. Our research of the Perfect was chiefly based on MA letters, legal and economic documents, and MA Laws. There are counterparts of such texts in OB as well, in which, however, the Perfect is used often enough only in letters, in the Laws of Eshnunna and in the Code of Hammurapi. In OB legal texts the Perfect occurs rarely (v. Huehnergard § 17.2; cf. Riftin).

For the synchronous analysis of the texts of different genres we have chosen the letters of Hammurapi and the Code of Hammurapi, since both the LH and the version of the CH that has come down to us on the stele, belong to the same period in Babylonian history, and probably come from the same source, namely, the offices of Hammurapi. During our work, when necessary, some other OB letters, and also LE were taken into account.

The Perfect being a component of the single aspect-tense verbal system, its usage was chosen to be studied along with that of the Present and Preterite in this work. When considered simultaneously Present forms and their English equivalents are underlined in broken line, Preterite forms — in one line and Perfect forms — in double line.

Footnotes' numbers most significant to the author are printed in bold.

Editions of the LH and of the CH referred to are as follows:

In the present work only those parts of the CH are taken into consideration that have been preserved on the stele itself, they are: the Introduction, the Conclusion, §§ 1—65, 100—261, 263—282. In § 53 non-preserved part of the protasis has been omitted; in §§ 65, 133a non-preserved apodoses have been omitted as well. §§ 274, 275 are damaged, but the verbal forms have not suffered and the context can be easily implied.
